WAXING AT THE J

There are many types of waxing suitable for removing unwanted hair. Waxing is a form of semi-permanent hair removal which removes the hair from the root. New hair will not grow back in the previously waxed area for four to six weeks, although some people will start to see regrowth in only a week due to some of their hair being on a different growth cycle. Almost any area of the body can be waxed, including an eyebrow touch-up, face, legs, under-arm and more.
